*Allowable Subject Matter*

1. Claims 1, 5, 7-8 are allowed.
2. The following is an examiner's statement of reasons for allowance:

The present invention relates to a liquid crystal display device for performing color display that is used in a color television, a personal computer or the like, and to particularly a liquid crystal display device for providing three primary color display by time-sharing and providing full color display by mixing the three primary colors without using any color filter. Independent claim 1 identified the uniquely distinct feature: "a circuit for determining a maximum among minimum levels of brightness of all pixels in a frame and multiplying the minimum levels of each pixel by a constant to create a display signal in the white field, the constant being determined by the maximum and a weight factor of the white field relative to the primary color fields; and a circuit for modulating the brightness of primary color light sources in the white field according to the constant, wherein the constant is automatically set depending on chances of displayed information." The closest art, APA, Kunzman and Agulnek et al. as discussed in the Office Action on 01.10.05 disclose related display, either singularly or in combination fail to anticipate or render the above underlined limitation obvious.

Claims 5 and 7-8 depend on claim 5.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
